DATA SHEET

LEGNOLAK

THE LONG LIFE ANTITARLO THAT IT PRESERVES PROTECTS AND COLORS THE WOOD

Features : Transparent protective wood product, based on synthetic resins, fungicidal and insecticidal agents and transparent pigments resistant to light and atmospheric agents. It quickly penetrates into the fibers of the wood, also protecting it from rotting caused by humidity, from blue rot as well as from molds, fungi and destructive insects; moreover it does not alter the transpiration capacity of the wood.

Appearance : Low viscosity colored liquids

Specific weight : 850 gr / lt for *Legnolak* transparent
900 gr / lt for *Legnolak* colored

Application : By brush, by air spray, by immersion.

Ford 4 cup viscosity 20 ° C : 11

Dilution : Ready to use

Flash point : > 40 ° C

Surrender : 10 - 12 sqm / lt per coat

Colors : Larch
Mahogany
Teak
walnuts
Transparent
Dark walnut
Rosewood

The colors are perfectly miscible with each other and therefore it is possible to compose others as desired; they are also miscible in all ratios with colorless, thus allowing to obtain lighter shades.
