DATA SHEET

SEGNALINEA WATER-BASED SIGNAGE PAINT FOR SPORTS FIELDS

Features	Water-based paint based on high quality synthetic resins in emulsion and special micronized fillers coated with wax. This makes the paint partially water repellent and very suitable. It is a thixotropic product therefore it can also be used at high thicknesses while maintaining the anchorage. This product is used in sports environments for the signage of soccer fields and tennis courts. The product is totally fireproof and free from substances classified as harmful.	
Binder	: Acrylcopolymer in aqueous emulsion.	
Appearance	: Opaque.	
Dry residue at 105 ° C	: 69 ±1%	
Residue at 450 ° C	: 66%	
Specific weight	: 1,700 - 1,720 Kg / lt	
Dilution	: with water 20 - 25%	
Surrender	: on average from 5 to 6 m2 per liter (1 coat)	
Color	: White.	
Drying	To the touch:	: 30 minutes
	Overlap	: 3 - 4 hours
VOC classification (Directive 2004/42 / EC)	:	: EU limit value for this product (Cat A / a): 30 g / l (2010) This product contains a maximum of 30 g / l VOC
