## DATA SHEET

### TERMOLAK® ANTI-CONDENSATION ANTI-MOLD

#### WASHABLE WATER-BASED PAINT FOR INTERIORS

#### **Features**

: Washable water-based paint for internal action Anti-condensation formula are Anti-mold, because in the present some microspheres and a particular type of fungicide.

This makes it advisable TERMOLAK® by community, men - if, pantries, where mold, blackening and other problems caused by condensation can develop due to the presence of food products in a humid environment.

TERMOLAK® creates the "double glass" type insulating effect due to the cavities of the microspheres and their very low thermal conductivity, and also develops a visu thermal insulating action to be realized by a warm and soft sensation to the touch.

The maximum performance of the product is obtained by applying a thickness of approximately 100 microns to the substrate, equivalent to 2 or more coats.

Finally, it is noted that the product is totally fireproof and non-toxic.

#### **Binder**

: Acrylic

#### **Appearance**

: Opaque

#### **Specific weight**

: 0,900 kg / lt

#### **Viscosity at 20 ° C**

: 30,000 - 32,000

#### **Yield / Application:**

By brush (recommended for civil plasters)

dilution with water 20-30% 3 sqm / lt 3 coats

By roller (short hair) (recommended for civil and gypsum plaster)

dilution with water 20-30% 4 sqm / lt 3 coats

#### **Washability**

: after 48 hours. 6000 brush strokes

#### **Color**

: White.

#### **Drying**

: To the touch : 60 minutes

Overlap : 8 hours
