DATA SHEET

WOODLAK

THE LONG LIFE ANTI WOODWOOD THAT PRESERVES PROTECTS AND COLORS THE WOOD

Characteristics : Transparent protective product for wood, based on synthetic resins, fungicide and insecticide agents and transparent pigments resistant to light and atmospheric agents.
It quickly penetrates the fibers of the wood, also protecting it from rot caused by humidity, from blue putridness, as well as from moulds, fungi and destructive insects; furthermore it does not alter the transpiration capacity of the wood. It leaves no lapping defects.

I wait : Low viscosity colored liquids

Specific weight : 850 gr / l for transparent Legnolak 900
gr / l for colored Legnolak

Application : By brush, by spraying with air, by immersion.

Viscosity cup Ford 4 20° C : 11

Dilution : Ready to use

Flash point : > 40 °C

Surrender : 10 - 12 m² / l per coat

Colors : Larch
Mahogany
Teak
Walnuts
Transparent
Dark Walnut
Rosewood

The colors are perfectly miscible with each other and therefore you have the possibility to compose others as you like; they can also be mixed in all ratios with the colorless, thus allowing to obtain lighter shades.
